### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

page 2, line 1, "motor2" was incorrect, therefor "2" was deleted.

2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or suggest an apparatus for placing pipe piling in the ground comprising in combination the rotary drive head assembly in which the pipe piling is rotated and screwed into the ground, and the clamping apparatus including a pair of horizontally disposed linear actuators and pair of pipe piling engaging clamps. The closest prior art includes Japanese reference '222 and Suver '295. Japanese reference discloses a rotary type pile driving device; however, Japanese '222 does not disclose any type of clamping device for engaging the pipe piling. Suver discloses a vibratory driver for pipe piling including a clamping device; however, it would have not been obvious to replace the vibratory driver with a rotary type driver such as Japanese '222. Furthermore, Japanese '222 is silent to the provision of a drive head which is connected to the output shaft and wherein the drive head is drivenly connectable to the upper end portion of the piling.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
